

A Highly maneuverable work horse, mobile drive reliably and tirelessly covers full spectrum of bedside, surgical and general diagnostic Radiography.

It excels in demand like environ like operation theatres, emergency rooms trauma care and ICU.

#### Value its Value

- Rugged spring balance stand with cantilever cross arm facilitating minimal patient repositioning during radiography, specially during demanding situation
- Tube swivels for lateral exposures.
- Quick release hand breaks provided for safe travel on gradients.

**MOVX MX 100mA**

## MX 100 a 2 Pulse full wave rectified X ray Generator

Rating	: 100 mA ,40 to 80 KV,0.4 Sec. 80 mA, 40 to 90 KV,0.8 Sec. 60 mA, 40 to 100 KV,2 Sec. 40 mA,40 to 100 KV ,5 Sec.
Exposure Control	: 23 steps Microcontroller based timer 0.04 Sec to 5 Sec.
Radiographic KV	: 40 to 100 KV Major and Minor Variation In 2 KV steps available.
X Ray Tube	: Stationary Anode.
Protection	: Ready, Exposure, Line voltage & over voltage indicator & Protection available
Collimator	: Light Beam Collimator.
Line Voltage Compensation	: 200 to 245 Volts
Power Requirements	: Single Phase 220 Volts,40 Amps with Earth.
